10/773,227 Art Unit: 2829

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 53, 1-36, and 59, 47-50, and 60, 51-52 drawn to an evaluation apparatus of a liquid crystal display device, classified in class 324, subclass 750.
 - II. Claims 54-55, 37-40 drawn to an evaluation method of a liquid crystal display device, classified in class 324, subclass 765.
 - III. Claims 56-58 and 41-46, drawn to a liquid crystal display device, classified in class 345, subclass 87.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product can be practiced with a different method comprising a further step for sensing a display state.
- 3. Inventions I and III are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as

Art Unit: 2829

claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different mode of operation and functions since the evaluation apparatus performs a test on a liquid crystal display device. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

- 4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the product can be practiced with a different method since the process is directed to an evaluation method of a liquid crystal display device, not to the crystal liquid display device by itself.
- 5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, the inventions have acquired a separate status in the art due to their recognized divergent subject matter, and the inventions require a different field of search (see MPEP § 808.02, restriction for examination purposes as indicated is proper.
- 6. If group1 is elected, a further election of species is required.
- 7. This application contains claims directed to the following patentably distinct species:

10/773,227 Art Unit: 2829

- a. species in which claims 53, 1-14 are drawn to an evaluation apparatus of a liquid crystal display device
- b. species in which claim 15 is drawn to a different evaluation apparatus
- c. species in which claims 16-21 are drawn to a different evaluation apparatus
- d. species in which claims 22-36 are drawn to a different evaluation apparatus
- e. species in which claims 47-50 are drawn to a different evaluation apparatus.
- f. species in which claims 60, 51-52 are drawn to a different evaluation apparatus
- 8. The species are independent or distinct because
 - species a further comprises storing detection results
 - species b does not require a plurality of field periods
 - species c does nor require a plurality of field periods but comprises storing detection results
 - species d comprises a specific location for an optical light receiving element and a video signal generating level changes
 - species e further comprises the liquid crystal display device having a drive
 circuit
 - species f further comprises storing in association with optimal level of test signal

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

- 9. If group II is elected, a further election of species is required.
- 10. This application contains claims directed to the following patentably distinct species:
 - aa. species in which claims 54 and 37 are drawn to an evaluation method
 - bb. species in which claim 55 is drawn to a different evaluation method
 - cc. species in which claim 38 is drawn to a different evaluation method
 - dd. species in which claims 39-40 are drawn to a different evaluation method

11. The species are independent or distinct because each comprises different steps for operating the evaluation apparatus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

- 12. If group III is elected, a further election of species is required.
- 13. This application contains claims directed to the following patentably distinct species:
 - i. species in which claims 56 and 41 are drawn to a liquid crystal display device

10/773,227 Art Unit: 2829

- ii. species in which claims 42-46 are drawn to a different liquid crystal display device.
- 14. The species are independent or distinct because species i does not require an undershoot test signal or a drive circuit while species ii does.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

15. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2829

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

- 16. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 17. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua Benitez whose telephone number is 571-270-1435. The examiner can normally be reached on M-Th, 7:30-5:00; F, 7:30-4:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ha Nguyen can be reached on 571-272-1678. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
